Answering letter date September 12, 1983
Subject Licensing Requirements
Land Disposal of
Radioactive Waste

In response to your letter of September 12, 1983, we have low level radioactive wastes at the Niagara site and are therefore interested in the licensing requirements for land disposal of radioactive wastes. Please send us a copy of the Nuclear Regulatory Commission's final rule.

Subject

LICENSING REQUIREMENTS FOR
LAND DISPOSAL OF RADIOACTIVE
WASTE

9/20/83

The Nuclear Regulatory Commission (NRC) is issuing regulations that set out licensing procedures, performance objectives and technical requirements for the licensing of facilities for the land disposal of low level radioactive waste

The Commission's final rule which will impose manifest and other requirements on generators of low level radioactive waste, will become effective December 27, 1983

Due to the length of the final rule, as published in the Federal Register, we have elected not to include copies for the entire distribution list

If you feel that these regulations would impact on your operation, please contact me and I will provide copies
